Kapitel 6: Konfigurationen

git

DATAMICS
machine intelligence consulting services

Video #1 – git init

```
pwd
git init neues-projekt
ls
cd neues-projekt
ls
ls -al
cd .git
ls
cd ..
echo "Mein neues Projekt :)" >> README.md
mkdir code
echo "Mein Code“ > mein_programm.py
git add .
git commit -m "init commit" .
git status
```

Video #2 – git ignore

```
pwd
cd neues-projekt
ls
git status
ls -al
echo "ignore_mich.txt" > .gitignore
echo "unwichtig" > ignore_mich.txt

ls -al
git status
git add .gitignore
git status
git commit -m „unwichtige Dateien ignorieren" .gitignore
git status
```

ls

Video #3 – Challenge

Download https://www.javatpoint.com/payment-billing-product-project
cd PaymentBilling
git init
ls -al

echo ".project" > .gitignore
echo ".settings" >> .gitignore
cat .gitignore

git status
git add .
git status
git commit -m "Mein neues Projekt"
